THIS IS A TIFFANY RING

MODERN LOVE

A Tiffany ring is a symbol of true connection, honoring love in all forms, from romance and engagement to every meaningful milestone.

It is a heartfelt declaration and commitment to truly honor one another. We handcraft designs that stand the test of time and are as enduring as love itself.

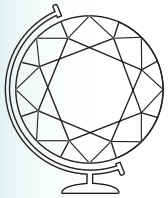

A TIFFANY LEGACY

Charles Lewis Tiffany was the first jeweler to establish the diamond ring as a symbol of love.

In 1886 he introduced the Tiffany® Setting, the world's most iconic engagement ring. Crowned the "King of Diamonds" for acquiring superlative European gems—including the French Crown Jewels—Charles Lewis Tiffany introduced the American public to rare gemstones from around the world. His debut of the Tiffany Diamond, one of the most important diamonds in history, not only highlighted his dedication to exemplary craftsmanship, it confirmed Tiffany as the world-renowned destination for diamonds.

100% CONFLICT-FREE

At Tiffany & Co., we are committed to sourcing high-quality diamonds with integrity.

We value traceability and the importance of knowing the origin—or provenance—of our diamonds from the moment they are unearthed. That's why we source rough diamonds only from known mines and sources in countries that are full participants in the Kimberley Process Certification Scheme. We also go beyond the Kimberley Process—with stringent chain of custody controls and by advocating for stronger global standards—to better ensure that human rights and the environment are protected. Our in-house cutting and polishing operations and vertically integrated supply chain further enable us to advance our industry-leading traceability and sustainability commitments to our customers. We also helped to launch the Initiative for Responsible Mining Assurances (IRMA) and are a founding member of the Responsible Jewellery Council.

IN PURSUIT OF PERFECTION

Every ring is expertly crafted with passion and precision to unleash intense vibrancy and light.

Treasured from the moment they're unearthed, stones selected for our engagement rings are entrusted to masterful artisans who bring decades of experience to their craft. Tiffany diamonds are cut to maximize beauty—angles, proportion and symmetry are obsessively considered, so that the stone's brilliance changes the very energy in the room.

THE TIFFANY® SETTING

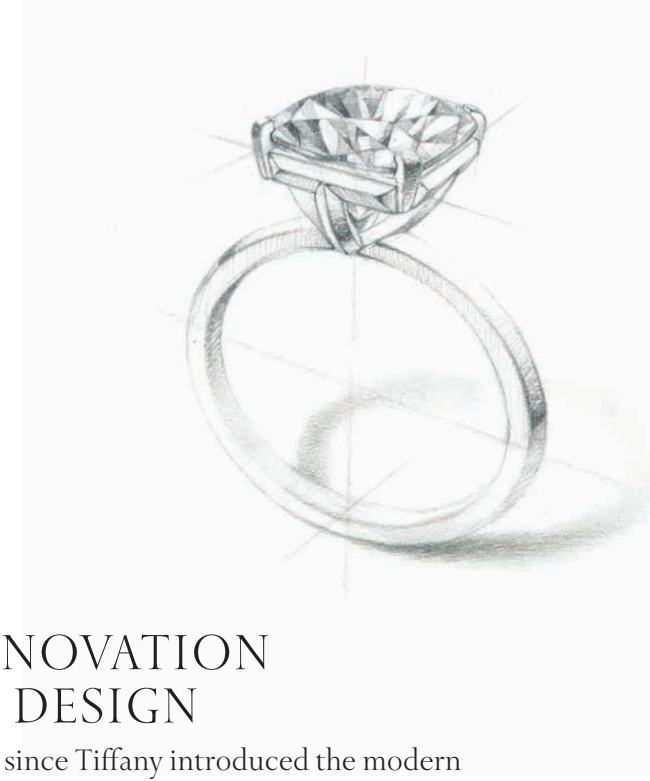

Introduced in 1886, the celebrated six-prong Tiffany® Setting lifts the diamond above the band and into the light. The result is a ring whose sparkling beauty has never been rivaled.

A TIFFANY® SETTING EMBODIES
A LEGACY OF INNOVATION AND ARTISTRY—
AN ICON FOR FUTURE GENERATIONS.

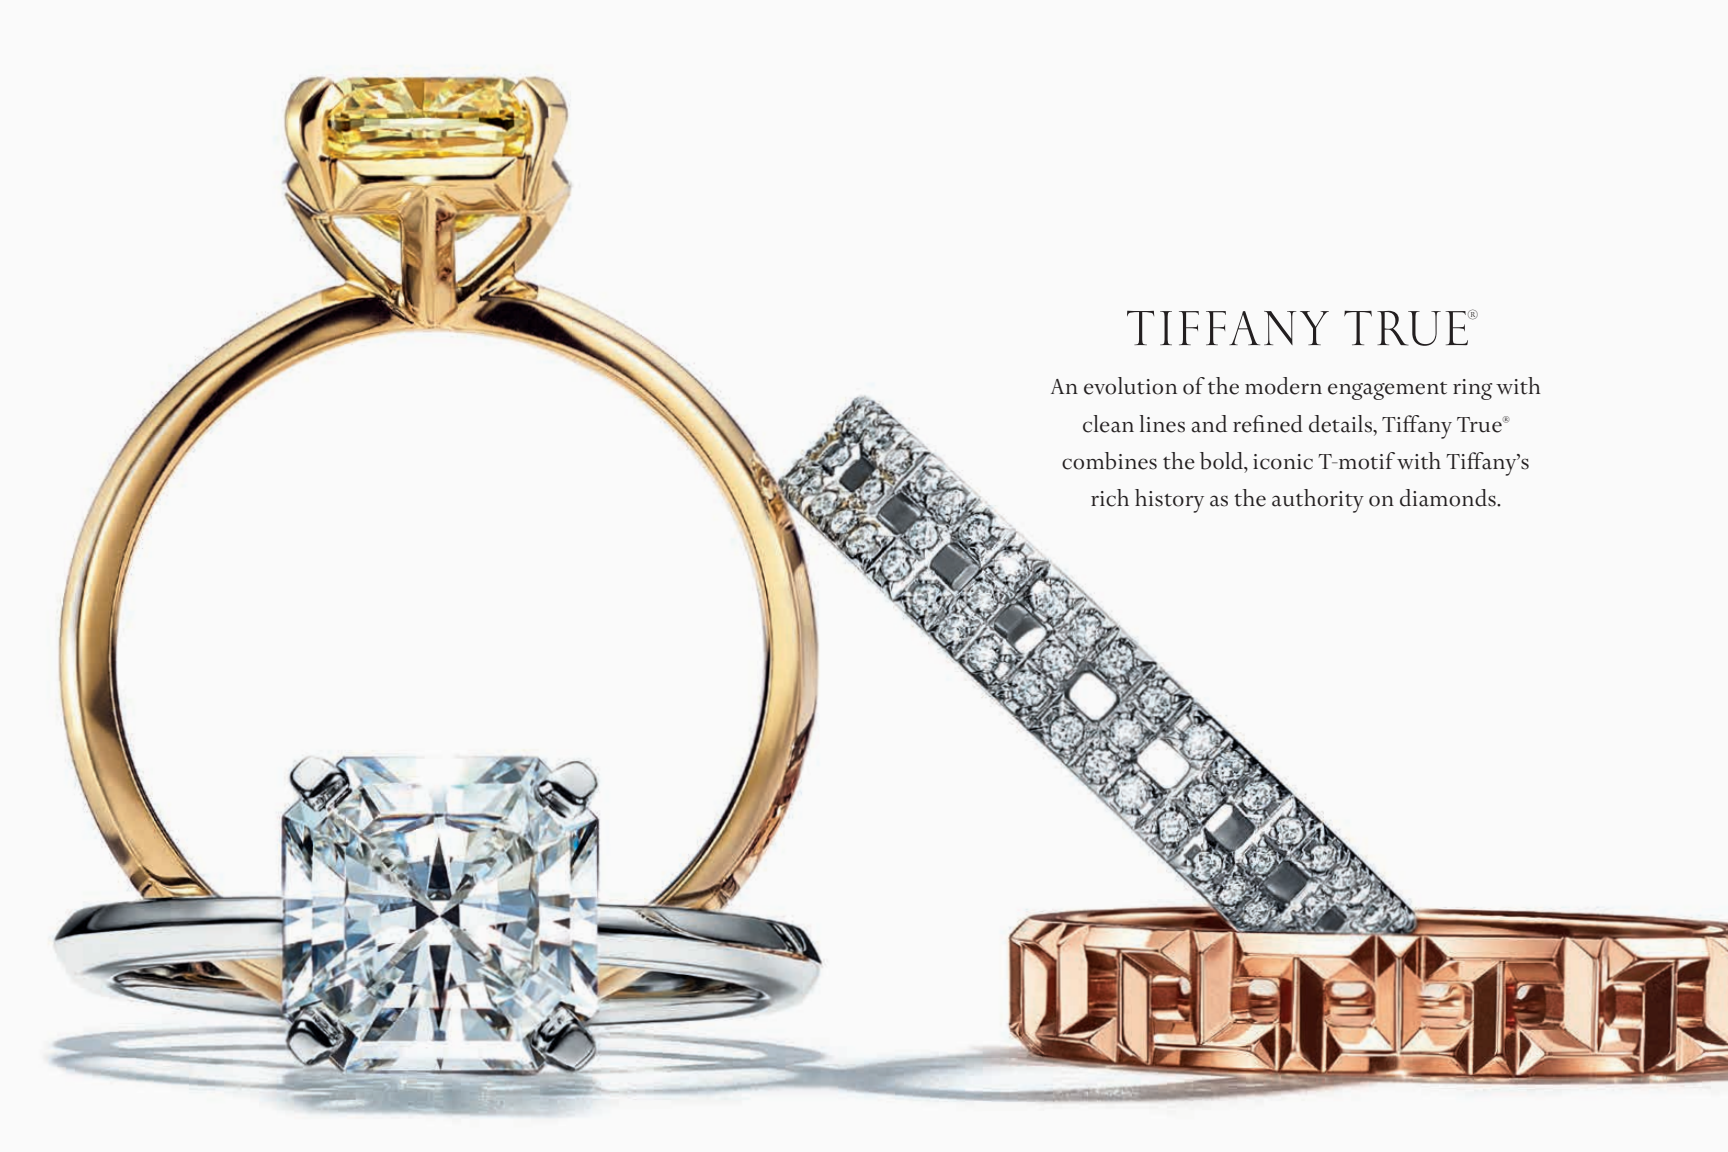

INNOVATION IN DESIGN

Ever since Tiffany introduced the modern engagement ring, it has played a part in the world's greatest love stories for over 130 years.

Tiffany continues this tradition with the introduction of the Tiffany True®. The innovative mixed-cut diamond ring was engineered by Tiffany, creating a new symbol for modern love.

TIFFANY TRUE®

An evolution of the modern engagement ring with clean lines and refined details, Tiffany True® combines the bold, iconic T-motif with Tiffany's rich history as the authority on diamonds.

TIFFANY SOLESTE

The breathtaking design maximizes the scintillation and visual impact of the center stone. Tiffany Soleste features a center stone surrounded by a crown of round brilliant bead-set diamonds.

TIFFANY HARMONY®

In the same way that lyrics and music effortlessly blend
together, Tiffany Harmony® engagement rings
pair perfectly with its coordinating wedding band
to form a harmonious design.

TIFFANY YELLOW DIAMONDS

Saturated with color and radiating a scintillating yellow light, rare yellow diamonds are as captivating as the morning sun and the one who wears them.

FANCY SHAPES

Featuring magnificent stones and diamond shapes, Tiffany fancy shapes are cut to exacting proportions and at the highest standards to maximize a diamond's ability to reflect and refract light.

THE TIFFANY GUIDE TO DIAMONDS

The 4Cs: cut, clarity, color and carat—represent the four universal standards that determine the rarity and quality of a diamond.

Together they impact a diamond's brilliance and beauty in profound ways. We frequently reject stones that would be accepted by others because only superlative diamonds earn the right to be placed in the legendary Tiffany Blue Box®. The incomparable beauty of Tiffany engagement rings is a result of our exceptional jewelry design, masterful craftsmanship and exacting standards across the 4Cs.

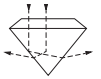

CUT is the most important of the 4Cs.

EXPERT SYMMETRY

EXCELLENT PROPORTION

TOO DEEP

TOO SHALLOW

MISALIGNED FACETS

Cut refers to the facet proportions on the surface of a diamond. It maximizes the beauty of a diamond and is controlled by human hands, not nature. Tiffany diamonds possess superlative fire and sparkle because we craft them to meet our exacting standards.

At Tiffany, we take the world's highest quality rough stones and put them in the hands of the world's most talented diamond cutters, crafting diamonds that outshine all others.

Expert Symmetry Facets precisely matching in size, shape and alignment create brilliance.

Excellent Proportion Light reflects brightly.

Too Deep Light escapes through the side.

Too Shallow Light escapes at the bottom.

Misaligned Facets Asymmetry interrupts the movement of light from one facet to the next.

CLARITY is a measure of the purity and rarity of a diamond.

It is determined by the visibility of imperfections under 10-power magnification as virtually all diamonds have imperfections of one type or another. A diamond is graded as flawless if, under 10-power magnification, no inclusions (internal flaws) or blemishes (external imperfections) are visible.

Tiffany maintains strict grading standards and rejects any diamond with noticeable imperfections to the unaided eye.

TIFFANY QUALITY*

D	E	F	G	H	I	J
COLORLESS			NEAR COLORLESS			

K	L	M	N	O	P	Q	R
FAINT YELLOW			VERY LIGHT YELLOW				

S	T	U	V	W	X	Y	Z
LIGHT YELLOW							

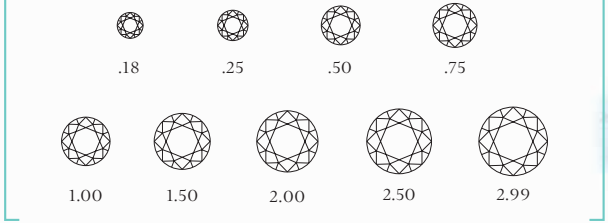

COLOR refers to the tint of the diamond.

In nature, most diamonds have a slight tint of yellow or brown. Tiffany only accepts stones in the "colorless" to "near colorless" range. The closer to being "colorless" a diamond is, the rarer and more valuable it is.

Additionally, the Tiffany Gemological Laboratory will not accept stones exhibiting strong or excessive fluorescence, which, in natural lighting, gives diamonds a milky appearance.

CARAT denotes the weight of the diamond. Tiffany diamonds are always cut to maximize brilliance, not carat weight.

Taken by itself, carat weight does not determine a diamond's value. For example, two one-carat stones can vary widely in price when clarity, color and cut are taken into consideration. When that is understood, it is clear that large diamonds of peerless quality are rare.

DIAMOND SHAPE is the geometric appearance of the diamond. Tiffany offers a wide range of diamond cuts and shapes, ensuring that every ring is as extraordinary as the love it represents.

Round Brilliant Exacting proportions reflect light and cast tiny rainbows in a dazzling display of sparkle and contrast.

True A modern mix combining a step-cut crown and brilliant-cut pavilion, displaying intense light and balanced with subtle rainbows.

Princess A bold, square-brilliant cut with over 50 chevron-shaped facets that create a shimmering array of reflections.

Cushion Rounded edges soften the traditional corners of a square or rectangular-cut diamond for a gently luminous effect.

Emerald Parallel cuts showcase the diamond's pure color and icy clarity.

Oval An elegant, elongated adaptation of the round brilliant cut with facets that make the light dance.

Pear Round brilliant and marquise-style cuts combine to form the teardrop shape with an extraordinary display of light.

Heart A series of precise cuts form this classic symbol of love.

TIFFANY DIAMOND CERTIFICATE AND FULL LIFETIME WARRANTY

The Tiffany Diamond Certificate is issued by Tiffany & Co. to certify the authenticity and integrity of serialized Tiffany diamonds. This document contains vital statistics related to your diamond, from its grades based on the 4Cs to its provenance information and its unique laser-inscribed serial number.

Our Diamond Certificate is backed by a Full Lifetime Warranty, which guarantees the grade of your diamond. Other diamond reports, including those from the Gemological Institute of America (GIA), do not contain such guarantees and even carry disclaimers.

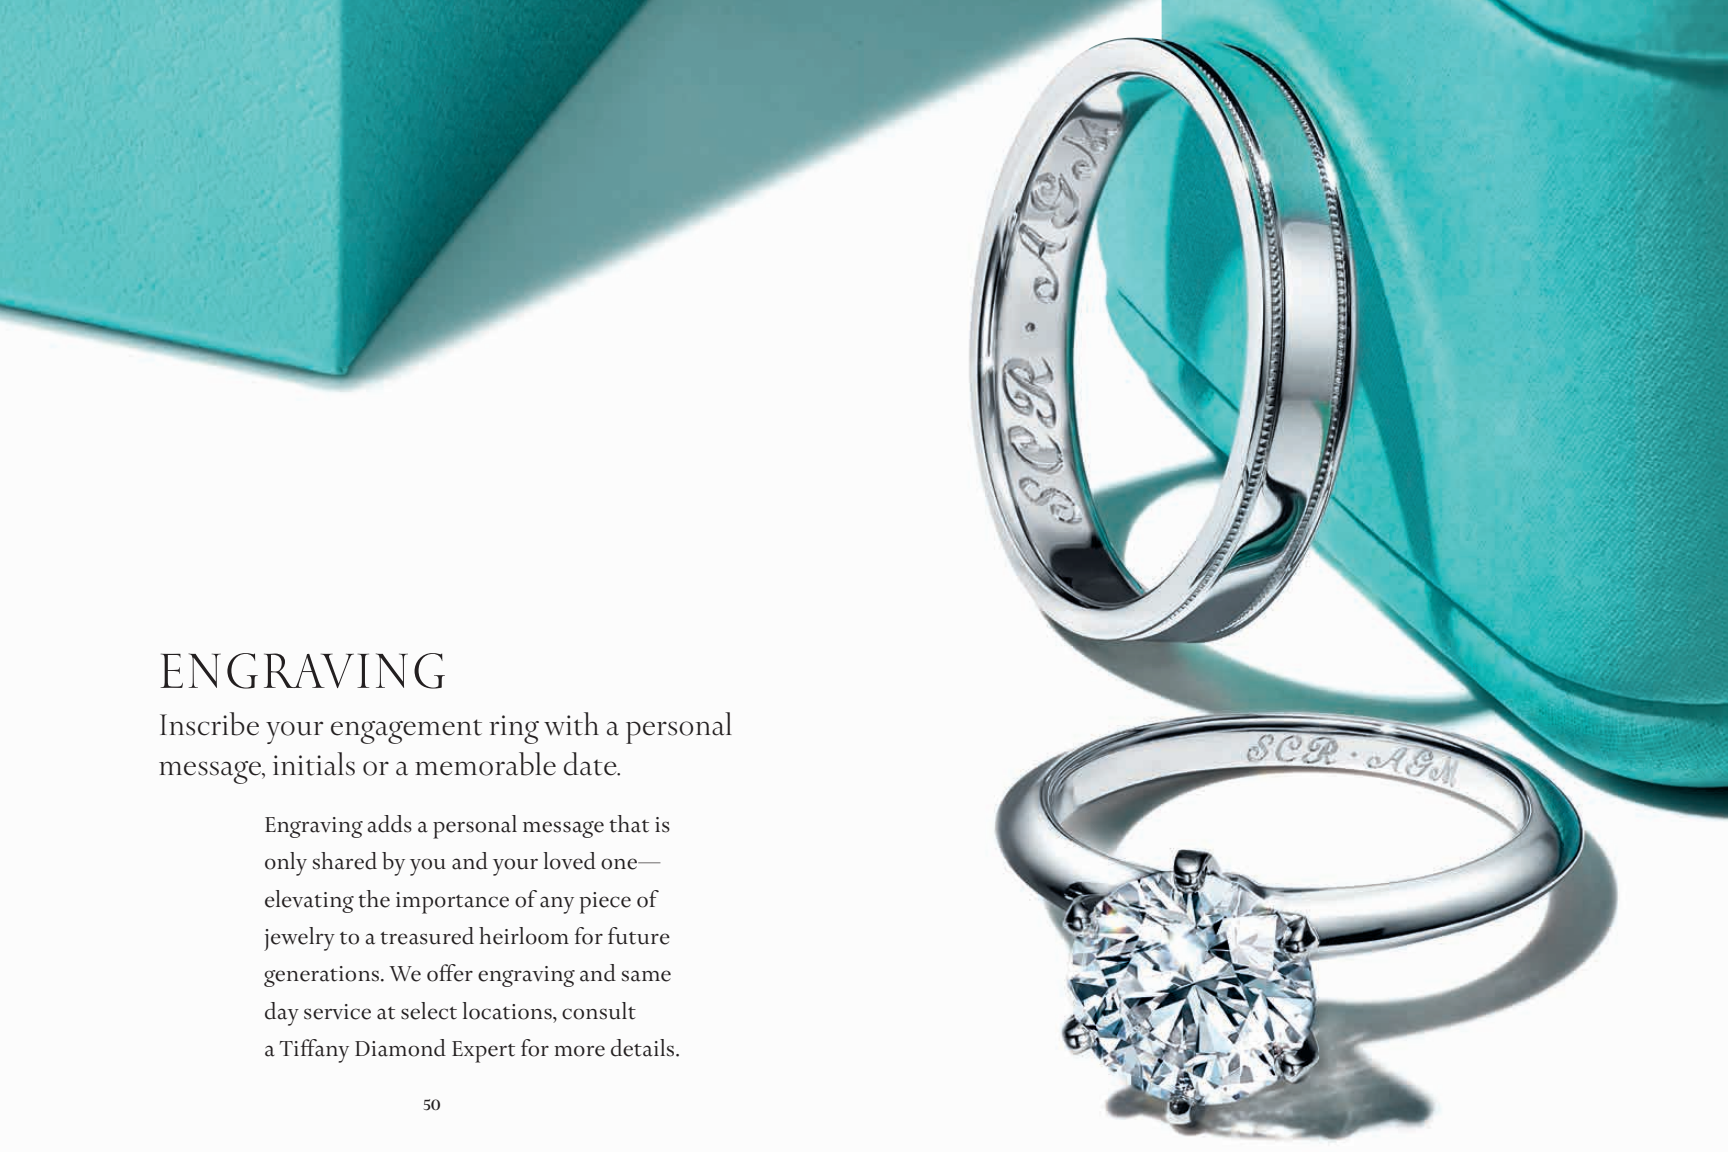

A RELATIONSHIP FOR LIFE
