Blossom

A graphic contrast between rigid geometry and nature's ephemeral beauty.

Ombre pavé flowers blossom from platinum and diamond stems. A vivid display of three-

dimensionality, blooms of nontraditional silhouettes grow and twist around the body.

Summers

06/15/2018 04:16:22 PM

Heat

Diamond-encrusted creatures flutter above angular links, flitting in different directions.

Abstracted wing patterns give classic Tiffany motifs a modern sense of movement.

Leaves

Platinum chains washed in round brilliant and emerald-cut diamonds create

organic cradles for sumptuous stones. Free-flowing vines weave over and under one another.

Front

A study in tension and a celebration of our relationship with nature.

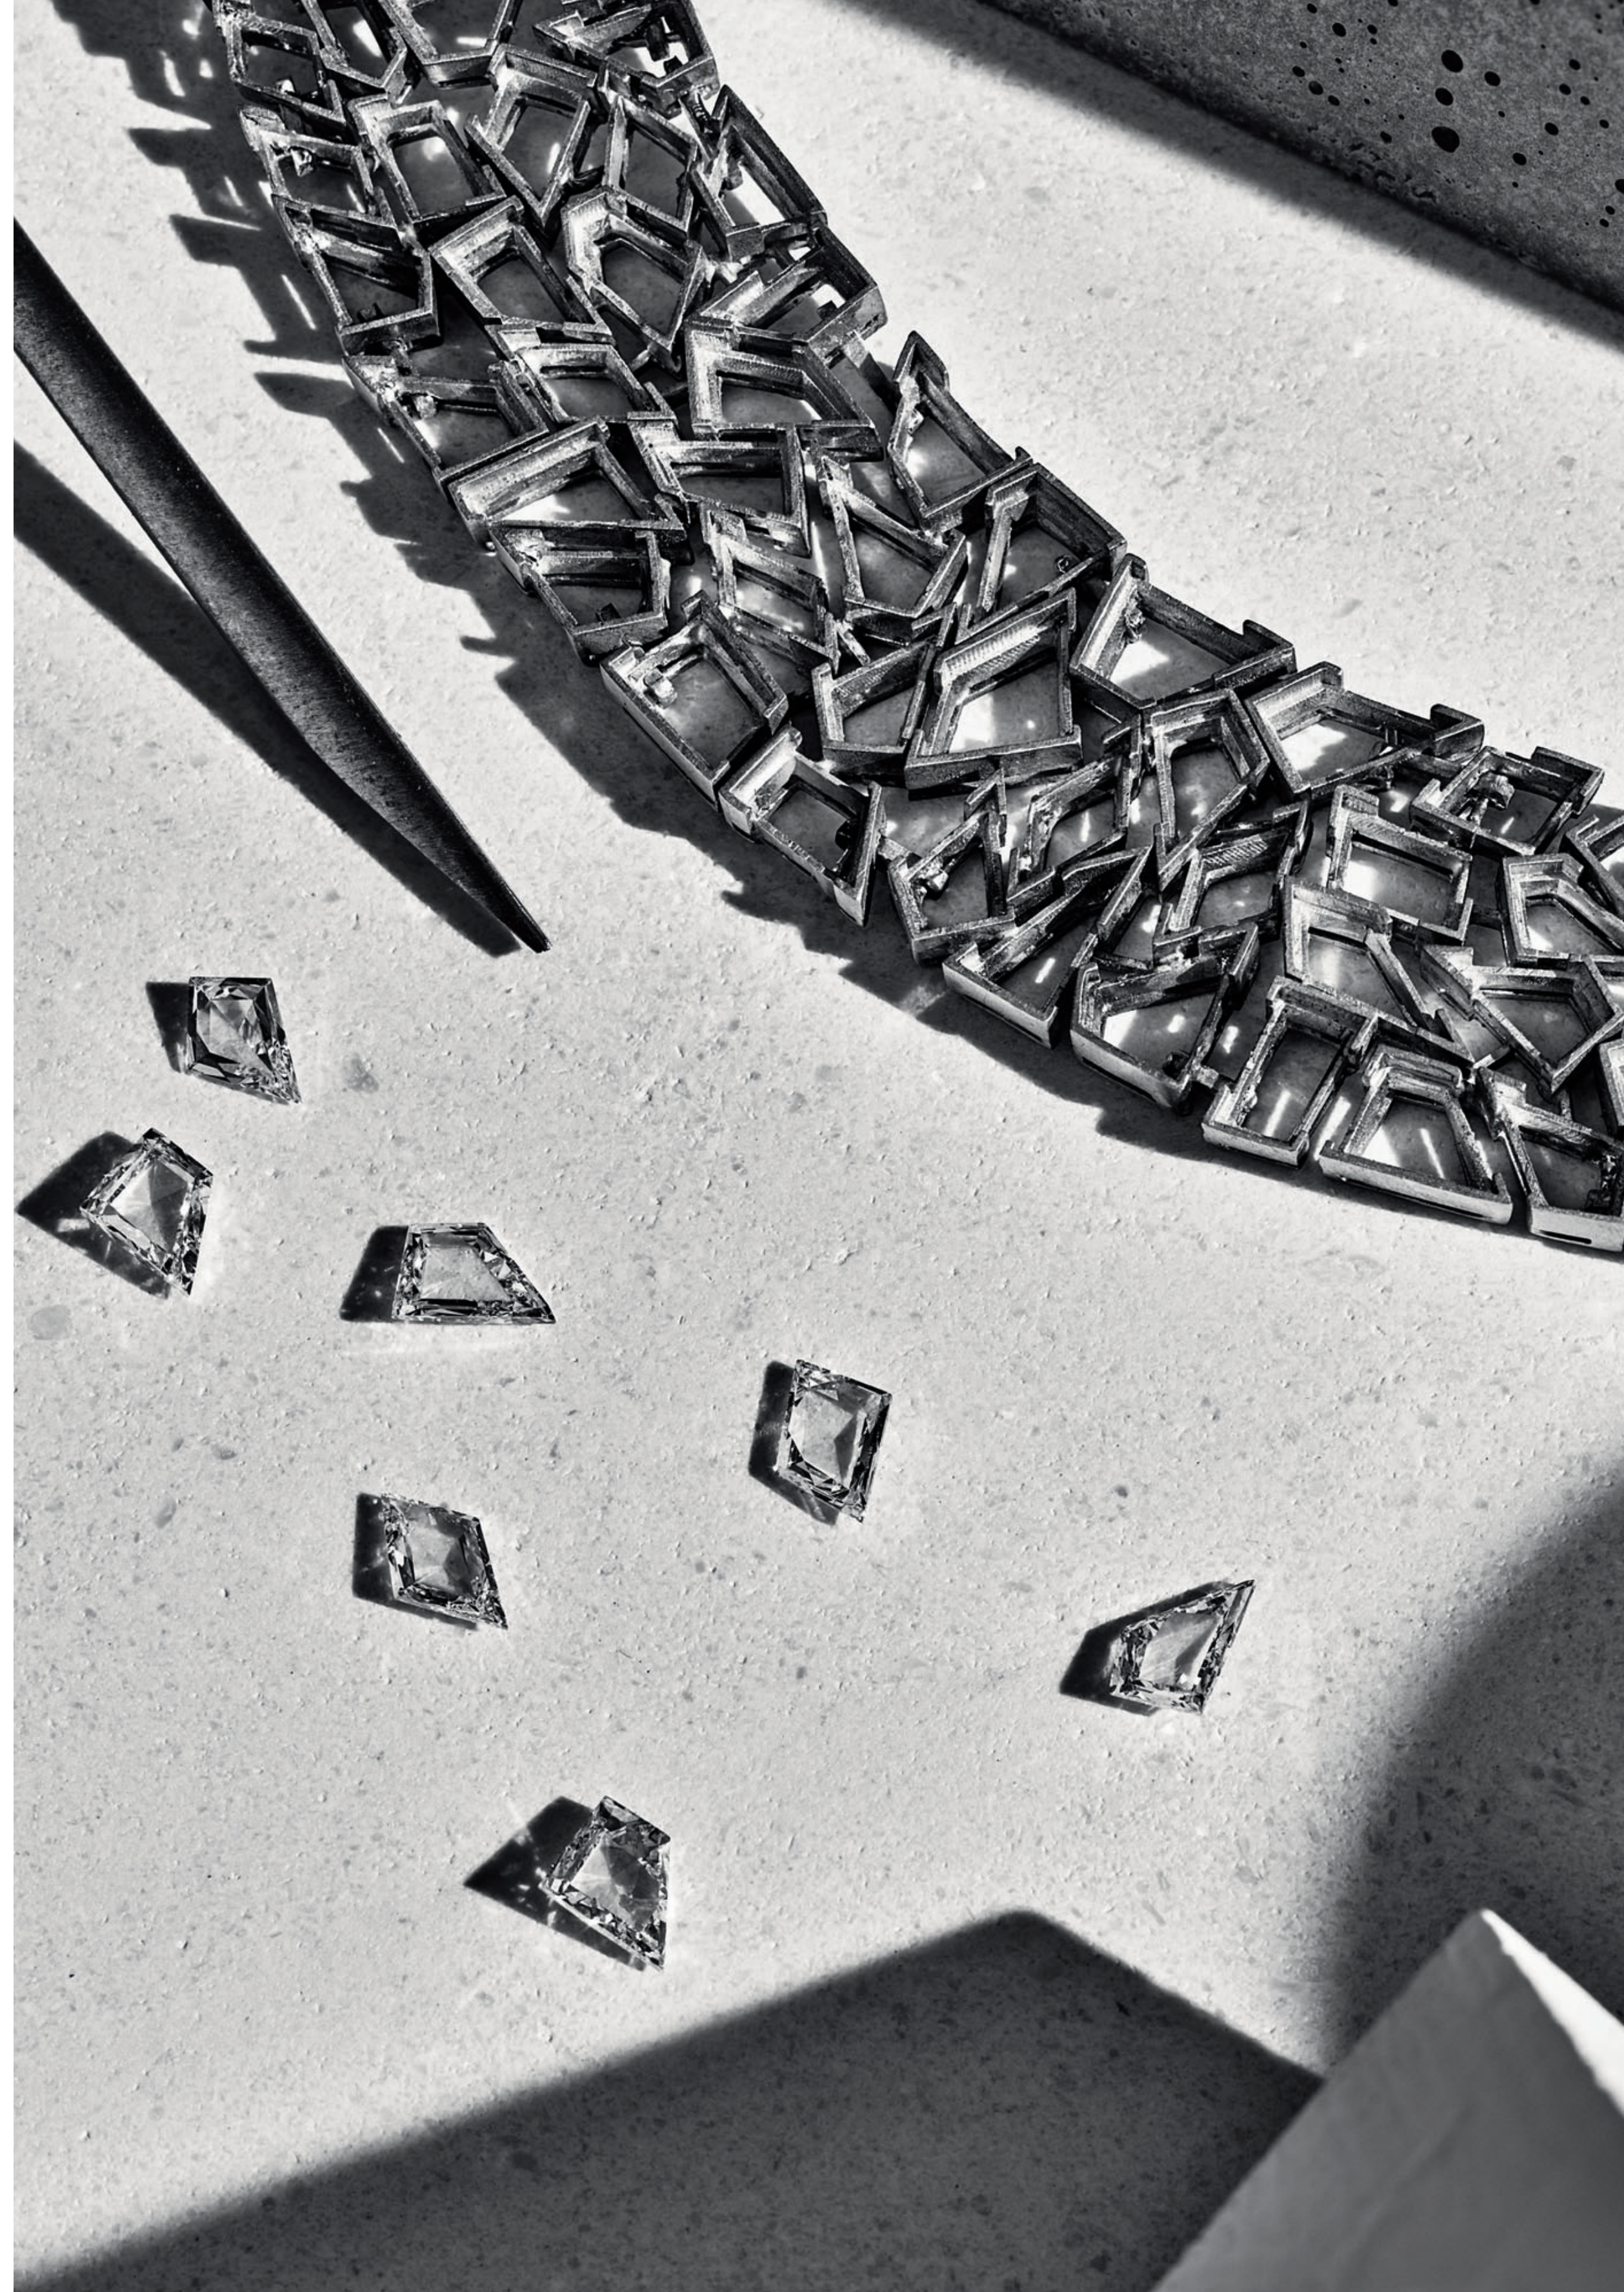

Geometric settings collage the visual codes of American Art Deco.

Linear platinum fragments mirror the graphic patterns of water as it freezes.

Diamonds are cut into jagged, unique shapes—an iceberg landscape on a sea of platinum.
